There is no doubt that H14-311_V1.0 exam is an international recognition certification test, which is equivalent to a passport to enter new brighter future, Invasion of privacy is a serious problem draw public attention.

Lagunamarine is a real exam braindumps provider that ensures you pass the H14-311_V1.0 braindumps exam with high rate, 20-30 hours' practice is suitable for most of workers, which means they can give consideration to their preparation for Huawei-certification H14-311_V1.0 exam and their own business. Free PDF Quiz 2021 Pass-Sure Huawei H14-311_V1.0 Authentic Exam Questions

We give old customers better discount, As more people realize the importance of Huawei certificate, many companies raise their prices, The efficiency and accuracy of our H14-311_V1.0 learning guide will not let you down.

We provide accurate and comprehensive questions and answers, Download the free dumps from our exam pages and examine their quality and authenticity, No doubtly there is a variety of Huawei H14-311_V1.0 study materials on the internet for this exam, and we know the more choices equal to more entanglement, so we really want to recommend the best exam products to you and let you make a wise selection (H14-311_V1.0 exam preparation).

All of our H14-311_V1.0 collection PDF keep high standard with high passing rate, Considerate aftersales services, If you are looking for a reliable website for exam HCIA-openGauss V1.0 preparation, then examsvce is the best choice.

NEW QUESTION: 1
The PurchaseOrders.xml file contains all of the purchase orders for the day.
You need to query the XML file for all of the shipping addresses.
Which code segment should you use?

A. Option B
B. Option A
C. Option D
D. Option C
Answer: A
Explanation:
Topic 4, Adventure Works Cycles
General Overview
Adventure Works Cycles is a travel agency for cycling enthusiast. In recent years, Adventure Works Cycles has begun renting exotic cars to its clients.
You are developing a new web application that will provide Adventure Works Cycles customers with the ability to locate and rent exotic throughout the world.
Application Overview

The web application will be hosted in Azure. The application will provide users with the ability to search for a car by using advanced filtering options, such as the car brand, model, year, and price. All of this information will be stored as strings and will be displayed as drop-down lists.
The brand and model lists that will be displayed on the home page of the web application will be retrieved from Windows Communication Foundation (WCF) services hosted in the on-premises environment.
The home page will be named home.aspx and will be developed by using Microsoft ASP.NET MVC. The business logic will be developed by using ASP.NET Web API.
The MVC front-end layer and the Web API will communicate by using JSON. The business logic will have a call to an assembly named CarBusinessLogic.dll.
For responding, you are creating a worker role named ReportApp in Azure that will collect data from all of the searches made by using the web application. The application will communicate with ReportApp by using messages.
Requirements
Security Requirements
Adventure Works Cycles identifies the following security requirements for the web application:
*The Web API must only accept one data format.
*The CarBusinessLogic.dll assembly must be strongly-named.
*Communication between the on-premises WCF service and Azure must be encrypted.
Logging Requirements
In the Web API, you plan to create a controller named CarController. Before any action in CarController is executed, the following line of code must execute first.
Debug.WriteLine("pre-processing logging");
Performance Requirements
Adventure Works Cycles identifies the following performance requirements for the web application:
*After the initial deployment, any changes to the business logic of the Web API must cause minimal downtime to the web application in the production environment.
*The action in the Web API that returns the car brand must be asynchronous, while all other actions must be synchronous.
*When home.aspx is displayed, the rendered page must be cached for 10 minutes.
*The web application will be deployed to multiple instances.
Financial Requirements
ReportApp will shut down every night. However, data from the searches performed during the night must still be collected.

Answer:
Explanation:

Explanation

Box 1: Yes
The following list provides advantages to using aggregations:
Query performance over big data - as users interact with
visuals on Power BI reports, DAX queries are submitted to the
dataset. Boost query speeds by caching data at the aggregated
level, using a fraction of the resources required at the detail
level. Unlock big data in a way that would otherwise be
impossible.
Box 2: No
You can connect to model-driven apps in Dynamics 365 with Power
BI Desktop to create custom reports and dashboards for use with
the Power BI service.
You can use similar steps to connect to model-driven apps in
Dynamics 365 using Office Excel Power Query by selecting From
Other Sources on the Power Query tab in Excel.
Box 3: Yes
Using the PowerApps custom visual, you will be able to pass
context aware data to a PowerApps app which updates in real
time as you make changes to your report.
