NEW QUESTION: 1

HOTSPOT

You have a hybrid Exchange Server 2016 organization.

Users use Outlook on the web. All mailboxes currently reside on-premises.

You have an internal public key infrastructure (PKI) that uses a certification authority (CA) named CA1.

Certificates are issued to users to sign and encrypted email messages.

You move a mailbox to Exchange Online and you discover that the mailbox fails to exchange signed or encrypted email messages from the on-premises mailbox users.

You need to ensure that all of the mailboxes that were moved to Exchange Online can send encrypted email messages to the on-premises mailboxes. The mailboxes must also be able to receive encrypted email messages from the on-premises mailboxes.

You export the required certificates to a file named Export.sst.

What command should you run next? To answer, select appropriate options in the answer area.
