NEW QUESTION: 1

The fading of wireless signals in free space is: how much does

the signal strength decrease every time the propagation distance is doubled?

- A. 2dB
- B. 3dB
- C. 6dB
- D. 9dB

Answer: C

NEW QUESTION: 2

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012. The domain contains 500 client computers that run Windows 8 Enterprise.

You implement a Group Policy central store.

You have an application named Appl. Appl requires that a custom registry setting be deployed to all of the computers.

You need to deploy the custom registry setting. The solution must minimize administrator effort.

What should you configure in a Group Policy object (GPO)?

- A. The Administrative Templates
- B. An application control policy
- C. Software installation setting
- D. The Group Policy preferences

Answer: D

Explanation:

A. User Configuration\Software Settings is for software settings that apply to users regardless of which computer they log on to. This folder also contains the Software installation subitem, and it might contain other subitems that are placed there by independent software vendors.

B. Las políticas de control de aplicación especifican que programas se pueden ejecutar en el equipo local y cuáles no.

Computer Configuration\Windows Settings\Security Settings\Application Control Policies

C. Group Policy preferences provide the means to simplify deployment and standardize configurations. They add to Group Policy a centralized system for deploying preferences (that is, settings that users can change later). You can also use Group Policy preferences to configure applications that are not Group Policy-aware. By using Group Policy preferences, you can change or delete almost any registry setting, file or folder, shortcut, and more. You are not limited by the contents of Administrative Template files. The Group Policy Management Editor (GPME) includes Group Policy preferences.
