customer owing to our high pass-rate H13-527_V4.0 pass-sure
torrent questions.

NEW QUESTION: 1
A network technician at a warehouse must implement a solution
that will allow a company to track shipments as they enter and
leave the facility. Additionally, warehouse workers must be
able to scan and concurrently upload large images of items to a
central server.
Which of the following technologies is BEST suited in this
facility? (Select TWO).
A. RFID
B. P2P
C. NFC
D. 802.11ac
E. Bluetooth
F. IR
Answer: A,D

NEW QUESTION: 2
Which of the following Cache Engines does Opswork have built in
support for?
A. There is no built in support as of yet for any cache engine
B. Both Redis and Memcache
C. Memcache
D. Redis
Answer: C
Explanation:

Explanation
The AWS Documentation mentions
AWS OpsWorks Stacks provides built-in support for Memcached.
However, if Redis better suits your requirements, you can
customize your stack so that your application servers use
OastiCache Redis.
Although it works with Redis clusters, AWS clearly specifies
that AWS Opsworks stacks provide built in support for
Memcached.
Amazon OastiCache is an AWS service that makes it easy to
provide caching support for your application server, using
either the Memcached or Redis caching engines. OastiCache can
be used to improve the application server performance running
on AWS Opsworks stacks.
For more information on Opswork and Cache engines please refer
to the below link:

NEW QUESTION: 3
A cloud administrator suggested using spot instances to reduce
cloud costs for part of a new cloud infrastructure.
Which of the following conditions must be addressed by the
application that will run on these instances?
A. The application needs to store data in a database.
B. There is a restriction for distributed network
communications.
C. The application needs to handle unpredictable instance
termination.
D. Resource-intensive compute loads will be forbidden.
Answer: C

NEW QUESTION: 4
An administrator is visiting a remote site that has on-net
calls with headquarters and one voice gateway for PSTN calls.
When using RTMT to monitor the bandwidth utilization of the
remote site, the administrator notices the OutOfResources
counter for the site in LBM has been increasing slowly in last
two weeks, but no call failure reports have been sent from this
site.
Which description about this issue is true?
A. The LBM service is malfunctioning.
B. The location-based CAC does not work properly.
C. The bandwidth settings of the site are fulfilling on-net
call volume.
D. AAR is routing some of the calls.

Answer: D
