If you determine to purchase reliable **H13-821_V2.0 Free Download Pdf** braindumps, our products should be the best choice for your considering.

NEW QUESTION: 1
True or False: Bank details for a business partner are part of the General BP role.
A. True
B. False
Answer: A
Explanation:
Bank details, meaning the business partner's bank accounts for where they receive and from where they
send their payments, are assigned in the General Data section and are thus common and usable
independent of the assigned business partner roles. The bank details you might enter in the
customer/supplier payment section (House Bank, Account ID) are per company code and define from
where the company code should pay or receive payments.

NEW QUESTION: 2

A. Option C
B. Option B

C. Option D
D. Option A
Answer: B

NEW QUESTION: 3

Answer:
Explanation:

Explanation

Box 1: Assign a tag to each resource.
You apply tags to your Azure resources giving metadata to
logically organize them into a taxonomy. After you apply tags,
you can retrieve all the resources in your subscription with
that tag name and value. Each resource or resource group can
have a maximum of 15 tag name/value pairs. Tags applied to the
resource group are not inherited by the resources in that
resource group.
Box 2: From the Cost analysis blade, filter the view by tag
After you get your services running, regularly check how much
they're costing you. You can see the current spend and burn
rate in Azure portal.
* Visit the Subscriptions blade in Azure portal and select a
subscription.
* You should see the cost breakdown and burn rate in the popup
blade.
* Click Cost analysis in the list to the left to see the cost
breakdown by resource. Wait 24 hours after you add a service
for the data to populate.
* You can filter by different properties like tags, resource
group, and timespan. Click Apply to confirm the filters and
Download if you want to export the view to a Comma-Separated
Values (.csv) file.
Box 3: Download the usage report
