NEW QUESTION: 3

DRAG DROP

Click the Task button.

Given a request from mybox.example.com, with an IP address of 10.0.1.11 on port 33086, place the appropriate ServletRequest methods onto their corresponding return values.

Answer:

Explanation:

NEW QUESTION: 4

In a default standalone installation of Oracle Solaris 11, what is the default minimum length in characters of a user password, and where is the minimum password length defined?

- A. Default minimum length is 6, and is defined in /etc/default/password.
- B. Default minimum length is 6, and is defined in /usr/sadm/defadduser.
- C. Default minimum length is 8, and is defined in /usr/sadm/defadduser.
- D. Default minimum length is 6, and is defined in /etc/shadow.
- E. Default minimum length is 8, and is defined in /etc/default/password.
- F. Default minimum length is 8, and is defined in /etc/shadow.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

By default, the passwd command assumes a minimum length of six characters. You can use the PASSLENGTH default in the /etc/defaults/passwd files to change that by setting the minimum number of characters that a user's password must contain to some other number.
