NEW QUESTION: 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

Your network contains an Active Directory domain named contoso.com. The domain contains a DNS server named Server1. All client computers run Windows 10.

On Server1, you have the following zone configuration.

You need to ensure that all of the client computers in the domain perform DNSSEC validation for the fabrikam.com namespace.

Solution: From Windows PowerShell on Server1, you run the Add-DnsServerTrustAnchor cmdlet.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Explanation

The Add-DnsServerTrustAnchor command adds a trust anchor to a DNS server. A trust anchor (or trust "point") is a public cryptographic key for a signed zone. Trust anchors must be configured on every non-authoritative DNS server that will attempt to validate DNS data. Trust Anchors have no direct relation to DSSEC validation.

NEW QUESTION: 3

An administrator is operating in a hybrid operating systems environment, trying to establish a datasource connection. The compatible portion succeeds, however, the JDBC portion failed with following error: XQE- JDB-0004 A problem occurred finding the driver class

"com.microsoft.sqlserver.jdbc.SQLServerDriver".

What is the possible cause for this error?

- A. missing gateway URI configuration
- B. unsupported driver version installed
- C. 64-bit client driver installed
- D. 32-bit client driver installed

Answer: A

Explanation:

Explanation/Reference:

Explanation:

Question

When testing a JDBC connection to Microsoft SQL Server 2005 / 2008 / 2012 you receive the error XQE- JDB-0004 A problem occurred finding the driver class

"com.microsoft.sqlserver.jdbc.SQLServerDriver".

Cause

The JDBC connector is missing or not properly installed for Cognos

Answer

You may need to download the .JAR files from Microsoft download center site:

<http://www.microsoft.com/en-us/download/details.aspx?displaylang=en&id=11774> or search for "Microsoft JDBC Driver for SQL Server" via your favorite search engine.

Follow the Microsoft instructions to download and install.
