NEW QUESTION: 1

- A. ISDN
- B. T3
- C. T1
- D. E1
- E. OC3

Answer: C

NEW QUESTION: 2

- A. Option C
- B. Option B
- C. Option D
- D. Option A

Answer: A

NEW QUESTION: 3

You want to improve the students' research skills by using ICT resources. The solution must help meet the school's organizational goals.

What should you do?

This item is part of a case study. To view the case study information, click on the Case Study button below.

- A. Work with the students to create a list of search terms.
- B. Tell the students to search for information on the Internet.
- C. Give the students printed Web pages about acid rain.
- D. Give the students a list of Internet links to sites about acid rain.

Answer: A

NEW QUESTION: 4

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

A company named Contoso, Ltd. has several servers that run Windows Server 2016. Contoso has a Hyper-V environment that uses failover clustering and Windows Server Update Services (WSUS). The environment contains several Windows containers and several virtual machines.

The WSUS deployment contains one upstream server that is located on the company's perimeter network and several downstream servers located on the internal network. A firewall separates the upstream server from the downstream servers. You plan to deploy a human resources application to a new server named HRServer5. HRServer5 contains a FAT32-formatted data volume.

The CIO of Contoso identifies the following requirements for the company's IT department:

- Deploy a failover cluster to two new virtual machines.
- Store all application databases by using Encrypted File System (EFS).

- Ensure that each Windows container has a dedicated IP address assigned by a DHCP server.
 - Produce a report that lists the processor time used by all of the processes on a server named Server1 for five hours.
 - Encrypt all communication between the internal network and the perimeter network, including all WSUS communications.
 - Automatically load balance the virtual machines hosted in the Hyper-V cluster when processor utilization exceeds 70 percent.
- You need to create a Data Collector Set to meet the requirement for the processor time report.

What command should you run to create the Data Collector Set?
To answer, select the appropriate options in the answer area.
