#### **NEW QUESTION: 1**

When you print invoices, you want to include a promotional code and static text that explains how to use the code. The

promotional code gives certain customers a discount on their next purchase. The promotional code has been added as a user-defined field to the business partner master data, based on the customer's previous purchase. If there is no promotional code in the customer master, both fields should not be printed. How can you implement this requirement using Crystal Reports? Please choose the correct answer.

**A.** Suppress the text field and add a formula that checks if the code is null.

**B.** Use a formula on the text field to change the contents of the text field to blank if the code is null.

**C.** Select both fields and link them using a sub-report. If the database field is null, the text field will not be printed.

**D.** Drag the two fields together in the report so that the boundaries of the two fields merge. If the user-defined field is null, the text field will not be printed.
