Answer: A

NEW QUESTION: 2

Your organization has a complex retention schedule that clearly defines retention policies for all document types. Each department has its own SharePoint site. In many cases, a single document library on a department site may contain financial files, human resources files, and project documentation. The following table lists the retention policies that are in place.

You must administer retention rules from a single location for each type of document and must leverage out of the box functionality. You need to configure the SharePoint environment to comply with the retention schedule. What should you do?

- A. Configure information management policies on content types.
- B. Activate the Disposition Approval feature.
- C. Activate the In-Place Records Management feature.
- D. Activate library and folder-based retention.
- E. Configure information management policies for the document libraries.

Answer: A

NEW QUESTION: 3

Projects L and S each have an initial cost of \$10,000, followed by a series of positive cash inflows. Project L has total, undiscounted cash inflows of \$16,000, while S has total undiscounted inflows of \$15,000.

Further, at a discount rate of 10 percent, the two projects have identical NPVs. Which project's NPV will be more sensitive to changes in the discount rate?

- A. Project L.
- B. The solution cannot be determined unless the timing of the cash flows is known.
- C. Both projects are equally sensitive to changes in the discount rate since their NPVs are equal at all costs of capital.
- D. Neither project is sensitive to changes in the discount rate, since both have NPV profiles which are horizontal.
- E. Project S.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

The NPV profile plots a project's NPV against the discount rates. The higher the undiscounted inflows, the steeper the NPV profile, and the steeper the NPV profiles, the more sensitive the project is to discount rate changes.

NEW QUESTION: 4

Which two considerations must a network engineer have when planning for voice over wireless roaming?

(Choose two.)

- A. Roaming occurs when the phone has reached -80 dBs or below.
- B. Full reauthentication introduces gaps in a voice conversation.
- C. Roaming occurs when the phone has seen at least four APs.
- D. Roaming with only 802.1x authentication requires full reauthentication.
- E. Roaming time increases when using 802.1x + Cisco Centralized Key Management.

Answer: B,D
