**A.** True
**B.** False
**Answer: A**

**NEW QUESTION: 3**
John works as a professional Ethical Hacker. He has been assigned the project of testing the security of www.we-are-secure.com. He wants to perform a stealth scan to discover open ports and applications running on the We-are-secure server. For this purpose, he wants to initiate scanning with the IP address of any third party.
Which of the following scanning techniques will John use to accomplish his task?
**Answer:**
Explanation:
D is incorrect. TCP SYN scanning is also known as half-open scanning because in this a full TCP
connection is never opened. The steps of TCP SYN scanning are as follows:
1.The attacker sends SYN packet to the target port.
2. If the port is open, the attacker receives SYN/ACK message.
3. Now the attacker breaks the connection by sending an RST packet.
4. If the RST packet is received, it indicates that the port is closed. This type of scanning is hard to trace because the attacker never establishes a full 3-way handshake connection and most sites do not create a log of incomplete TCP connections.

**NEW QUESTION: 4**
DRAG DROP
You have a server that has Exchange Server 2013 installed.

You plan to deploy Unified Messaging (UM) to all users.
You have two UM IP gateways named GW1 and GW2.
You create, and then associate a new UM dial plan for each IP gateway. The IP gateways are configured as shown in the following table.

You need to recommend a solution that meets the following security requirements:
* All voice traffic received by GW1 must be encrypted.
* All voice traffic received by GW2 must be unencrypted.
* All signaling traffic to GW1 and GW2 must be encrypted.
Which security settings should you recommend configuring for each dial plan?
To answer, drag the appropriate security setting to the correct UM dial plan in the answer area. Each security setting may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.
