NEW QUESTION: 2

Yoga

A

(1) One of today's hottest fads is also one of the world's oldest practices the ancient art of yoga. (2) Yoga is different from other fitness activities because it is not only physical. (3) In the correct form, yoga is a practice of unification: an emotional, spiritual, and physical exercise.

B

(4) A simple sitting pose such as staff pose, for example, requiring that you to tighten and lengthen stomach, back, and arm muscles as you stretch your legs out in front of you and place your hands by your side. (5) More difficult poses, such as brave warrior, require you to balance on one leg and hold a pose that strengthens leg, back, and stomach muscles. (6) Though they may seem easy to those who have never practiced, yoga poses require great concentration, and they are surprisingly effective in stretching and strengthening muscles.

C

(7) While yoga tones and strengthens the body, it also tones and strengthens the mind. (8) Many poses can be only held if you are completely focused on the task, and full benefit of the poses are coming only through proper breathing. (9) Concentrated, deep breathing during yoga helps you extend more fully into the poses. (10) Thereby gaining greater benefit from the stretch. (11) And the steady circulation of breath through you're body both calms and energizes.

D

(12) I am still relatively new to the practice of yoga. (13) I have been practicing yoga for only one year. (14) I am addicted to yoga unlike any other physical activity because it is also a spiritual practice. (15) Through yoga, I am able to release tensions that lodge in various parts of my body: the tight shoulders, the cramped legs, the belly that is in knots. (16) The physical release is also a spiritual release. (17) I feel calm after doing yoga, reconnected to my body, and reconnected to my inner self.

Sentences 9 and 10: Concentrated, deep breathing during yoga helps you extend more fully into the poses. Thereby gaining greater benefit from the stretch.

Which correction should be made to the underlined portion of sentences 9 and 10?

- A. Change the period to a comma and add so.
- B. Delete the period.
- C. Change the period to a comma.
- D. No correction is necessary
- E. Change the period to a semicolon.

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Sentence 10 is an incomplete thought (sentence fragment) and must be connected to sentence 9. A semicolon can only be placed between two independent clauses (complete thoughts), so choice b is incorrect. Choice c is incorrect because so and thereby together create an awkward transition between sentences, and so does not convey the correct relationship between sentences. Choice d is incorrect because sentence 10 is "unnecessary" information and should be set off by commas. Choice e is incorrect because the sentence fragment must be corrected.

NEW QUESTION: 3

Your company deploys an Azure App Service Web App. During testing the application fails under load. The application cannot handle more than 100 concurrent user sessions. You enable the Always On feature. You also configure auto-scaling to increase counts from two to 10 based on HTTP queue length. You need to improve the performance of the application. Which solution should you use for each application scenario? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation

Box 1: Content Delivery Network

A content delivery network (CDN) is a distributed network of servers that can efficiently deliver web content to users. CDNs store cached content on edge servers in point-of-presence (POP) locations that are close to end users, to minimize latency. Azure Content Delivery Network (CDN) offers developers a global solution for rapidly delivering high-bandwidth content to users by caching their content at strategically placed physical nodes across the world. Azure CDN can also accelerate dynamic content, which cannot be cached, by leveraging various network optimizations using CDN POPs. For example, route optimization to bypass Border Gateway Protocol (BGP).

Box 2: Azure Redis Cache

Azure Cache for Redis is based on the popular software Redis. It is typically used as a cache to improve the performance and scalability of systems that rely heavily on backend data-stores. Performance is improved by temporarily copying frequently accessed data to fast storage located close to the application. With Azure Cache for Redis, this fast storage is located in-memory with Azure Cache for Redis instead of being loaded from disk by a database.
