If so, you can just take it easy now, since our company is here especially for giving you an antidote --our C_ARCON_2105 exam questions.

NEW QUESTION: 1

A company plans to use third-party application software to perform complex data analysis processes. The software will use up to 500 identical virtual machines (VMs) based on an Azure Marketplace VM image.

You need to design the infrastructure for the third-party application server. The solution must meet the following requirements:

The number of VMs that are running at any given point in time must change when the user workload changes.

When a new version of the application is available in Azure Marketplace it must be deployed without causing application downtime.

Use VM scale sets.

Minimize the need for ongoing maintenance.

Which two technologies should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. managed disks

Introduction to Azure managed disks

<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/managed-disks-overview> "Using managed disks, you can create up to 50,000 VM disks of a type in a subscription per region, allowing you to create thousands of VMs in a single subscription. This feature also further increases the scalability of virtual machine scale sets by allowing you to create up to 1,000 VMs in a virtual machine scale set using a Marketplace image."

B. single storage account

C. single placement group

D. autoscale

Answer: A,D

NEW QUESTION: 2

A Canadian-based company has a long-term contract with a US-based supplier. The Canadian company has been experiencing short shipments and variations of the supply lead time with the US supplier for a few months. Which of the following is the most appropriate action for the master production scheduler in this situation?

A. Apply safety lead time according to the target service level while planning the master production schedule.

B. Apply safety stock and safety lead time while planning the master production schedule.

C. Ask the purchasing manager to terminate the contract with this supplier, and look for a better supplier.

D. Ask the purchasing manager to work with the supplier to improve their shipping quantity accuracy and lead time stability.

Answer: A

NEW QUESTION: 3

What is the main output of Monitoring and Controlling?

A. Project product

- B. Controlling stakeholders
- C. Corrective action
- D. Charter

Answer: C
